

IN THE SPECIFICATION

pg
B3
The belt 350 is preferably of urethane (the same material as most skate wheels) because of its toughness and abrasion resistance. Urethane belts of the type illustrated in Fig. 3 are made as timing belts in a variety of sizes, with steel braid or aromatic polyamide such as KEVLAR fabric reinforcement; they are available from BRECOflex Co., LLC, of Eatontown, NJ. The belt 350 has indentations 352 that engage gear teeth when it is used as a timing belt.
